Executive Summary

April 2026 represents a significant improvement over March across all platforms. Meta blended ROAS rose from 9.1x to 10.2x, Google AE PMax (UAE) is delivering 9.3x at $21.94 CPO, and Snapchat is the highest-efficiency platform at 18.3x ROAS — yet receives the smallest share of budget. The central finding across all three platforms is identical: **UAE is dramatically outperforming KSA on ROAS and CPO efficiency while receiving a disproportionately small share of spend.**

Four underperforming Meta campaigns have been paused today (2.4–5.0x ROAS), freeing approximately $2,227/month to redirect toward UAE. New Format Test KSA and New Format Test KU & QA are flagged for review. Snapchat KSA requires urgent creative refresh — audience fatigue is severe (impressions down 88%, CPC up from $0.28 to $5.63).

Action required — KSA Snapchat creative refresh: Impressions collapsed 88% in 3 weeks. CPC went from $0.28 → $5.63. Without new creative, this campaign will be effectively dead within 7–10 days.

UAE Snapchat opportunity: Fresh audience, CPC $0.55, swipe rate 1.4%. Currently at $50/day — doubling to $100/day is very low risk. Apr 27 proved 51x ROAS is possible on $50 spend.
